

# Save a Life! Learn CPR.

## BLS for Healthcare Providers

*A comprehensive program that teaches the basic techniques of adult, child and infant CPR and the use of an automated external defibrillator. This course is designed for those who may come upon a life threatening emergency. Students will learn CPR; foreign body airway obstruction; and utilization of mouth-to-mouth, mouth-to-mask, and bag-valve ventilation skills. Students will also be certified in the utilization of an automated external defibrillator (AED).*

- *AHA Certification is obtained upon successful completion.*
- *Student must demonstrate the skills and pass a written tests.*
- *Certification is for two years.*
- *Majority of class time will be spent on the practicing/learning skills utilizing the manikins. Students are encouraged to dress comfortably.*
- *One- and two-rescuer CPR*
- *Obstructed airway*
- *Mouth-to-mask ventilation*
- *Bag-valve mask ventilation*
- *Automated External Defibrillator (AED) Training*
